PATENT

Section I: AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A method for enabling a user to forward ~~forwarding of~~ only selected incoming telephone calls from a first number to a second number, said second number being a number of a user wireless device, said method comprising:

~~identifying enabling user input to said user wireless device to identify selected source phone numbers for from which incoming telephone calls may be placed to said first number incoming telephone calls to said first number which a user wishes to have forwarded from said first number to said second number;~~

displaying said selected source phone numbers on a said user wireless device;

enabling user input of said second number to said user wireless device;

displaying said second number on said user wireless device; and

enabling said user to provide an input to accept said second number and said selected source phone numbers whereby only incoming telephone calls to said first number from said identified selected source phone numbers are ~~transferred~~ forwarded from said first number to said second number.

2. (Currently Amended) The method as set forth in claim 1 wherein incoming phone calls from phone numbers other than said selected source phone numbers are processed by a default process.

3. (Original) The method as set forth in claim 2 wherein said default process is a voice mail system.

ATTORNEY DOCKET: AUS920010294US1

PATENT

4. (Original) The method as set forth in claim 1 wherein said transferring is accomplished by a server device.

5. (Original) The method as set forth in claim 4 wherein said identifying is accomplished by a user remote from said server device.

6. (Currently Amended) The method as set forth in claim 5 wherein said identifying is accomplished by a user inputting said selected source phone numbers into said user wireless device and sending said selected source phone numbers from said user wireless device to said server device.

7. (Currently Amended) The method as set forth in claim 5 wherein said identifying is accomplished by a user relative to a selection menu displayed on said user wireless device.

8. (Currently Amended) The method as set forth in claim 7 wherein said selection menu is stored in said user wireless device.

9. (Currently Amended) The method as set forth in claim 7 wherein said selection menu is stored in said server device, said server device being selectively operable to effect a presentation of said selection menu on said user wireless device.

10. (Currently Amended) The method as set forth in claim 1 wherein said selected source phone numbers are selected from a file containing phone numbers and names associated with said phone numbers.

11. (Currently Amended) The method as set forth in claim 10 wherein said selected source phone numbers are determined by

ATTORNEY DOCKET: AUS920010294US1

PATENT

designating only selected ones of said phone numbers in said file.

12. (Currently Cancelled).

13. (Currently Amended) The method as set forth in claim 5 wherein said user wireless device includes input means for enabling said user to input said selected source phone numbers.

14. (Currently Amended) The method as set forth in claim 5 wherein said user wireless device is a cell phone.

15. (Currently Amended) The method as set forth in claim 5 wherein said user wireless device is a two-way pager device.

16. (Currently Amended) The method as set forth in claim 5 wherein said user wireless device is a computer device.

17. (Currently Amended) The method as set forth in claim 5 wherein said user wireless device is a laptop computer.

18. (Currently Amended) A storage medium including machine readable coded indicia, said storage medium being selectively coupled through a reading device to processing circuitry within a computing system, said computing system being arranged to receive and re-direct incoming telephone calls, said reading device being selectively operable to read said machine readable coded indicia and provide program signals representative thereof, said program signals being effective to enable a forwarding of only selected ones of said incoming telephone calls from a first number to a second number, said second number being a number of a user wireless device, said program signals being further effective to accomplish the steps of:

ATTORNEY DOCKET: AUS920010294US1

PATENT

~~identifying~~ enabling user input to said user wireless device to
identify selected source phone numbers ~~for~~ from which incoming
telephone calls may be placed to said first number ~~incoming~~
~~telephone calls to said first number which a user wishes to have~~
~~forwarded from said first number to said second number;~~

displaying said selected source phone numbers on a said user
wireless device;

enabling user input of said second number to said user wireless
device;

displaying said second number on said user wireless device; and

enabling said user to provide an input to accept said second
number and said selected source phone numbers whereby only
incoming telephone calls to said first number from said
identified selected source phone numbers are ~~transferred~~
forwarded from said first number to said second number.

19. (Currently Amended) The medium as set forth in claim 18
wherein incoming phone calls from phone numbers other than said
selected source phone numbers are processed by a default process.

20. (Original) The medium as set forth in claim 19 wherein said
default process is a voice mail system.

21. (Original) The medium as set forth in claim 18 wherein said
transferring is accomplished by a server device.

22. (Original) The medium as set forth in claim 21 wherein said
identifying is accomplished by a user remote from said server

device.

23. (Currently Amended) The medium as set forth in claim 22 wherein said identifying is accomplished by a user inputting said selected source phone numbers into a user wireless device and sending said selected source phone numbers from said user wireless device to said server device.

24. (Currently Amended) The medium as set forth in claim 22 wherein said identifying is accomplished by a user relative to a selection menu displayed on said user wireless device.

25. (Currently Amended) The medium as set forth in claim 24 wherein said selection menu is stored in said user wireless device.

26. (Currently Amended) The medium as set forth in claim 24 wherein said selection menu is stored in said server device, said server device being selectively operable to effect a presentation of said selection menu on said user wireless device.

27. (Currently Amended) The medium as set forth in claim 18 wherein said selected source phone numbers are selected from a file containing phone numbers and names associated with said phone numbers.

28. (Currently Amended) The medium as set forth in claim 27 wherein said selected source phone numbers are determined by designating only selected ones of said phone numbers in said file.

29. (Currently Amended) A processing system including a system bus, and a processor, a memory system, and a network interface,

ATTORNEY DOCKET: AUS920010294US1

PATENT

all coupled to said system bus, said processing system being arranged to receive and re-direct incoming telephone calls, said processing system being operable to enable a forwarding of only selected ones of said incoming telephone calls from a first number to a second number said second number being a number of a user wireless device, said system being further operable for ~~by~~ enabling a said user of a said user wireless device to identify, on a display associated with said user wireless device, selected source phone numbers for incoming telephone calls which said user wishes to have forwarded from said first number to said second number, said processing system being operable for displaying said selected source phone numbers on said user wireless device and enabling input of said second number to said user wireless device, said processing system being further operable for displaying said second number on said display of said user wireless device and enabling said user to provide an input to accept said second number and said selected source phone numbers whereby only incoming telephone calls to said first number from said identified selected source phone numbers are ~~transferred~~ forwarded from said first number to said second number.

30. (Currently Cancelled).

31. (Currently Amended) The processing system as set forth in claim 29 wherein said user wireless device includes input means for enabling said user to input said selected source phone numbers.

32. (Currently Amended) The processing system as set forth in claim 29 wherein said user wireless device is a cell phone.

33. (Currently Amended) The processing system as set forth in claim 29 wherein said user wireless device is a two-way pager

device.

34. (Currently Amended) The processing system as set forth in claim 29 wherein said user wireless device is a computer device.

35. (Currently Amended) The processing system as set forth in claim 29 wherein said user wireless device is a laptop computer.
